The Japan Securities Dealers Association (JSDA) is an association that functions as both a self-regulatory organization and as an interlocutor between market participants and various stakeholders, including government authorities. Both functions operate independently. JSDA is made up of approximately 470 members that include securities firms and other financial institutions running securities businesses in Japan.

The Investment Industry Association of Canada (IIAC) is the national association representing the position of 144 IIROC-regulated Dealer Member firms on securities regulation, public policy, and industry issues. These dealer firms are the key intermediaries in Canadian capital markets, accounting for the vast majority of financial advisory services, securities trading, and underwriting in public and private markets for governments and corporations.
